Hi s22,

Attached please find a method summary for the Benzene analysis performed by our third party laboratory.

Regards,
Joe

Subject: TGA method for analysis of benzene in sunscreen products [SEC=OFFICIAL]

CAUTION: This message was sent from outside of Edgewell. Please use proper judgement and caution when opening attachments, clicking links, or responding to this email.

Dear Joe,

Thanks for the discussion during the meeting this morning.

Please see the attached method used by TGA for the analysis of sunscreen products for the presence of benzene. I hope this can help assist Edgewell with future testing of sunscreen products for the presence of Benzene. We are happy to answer any further questions you may have relating to the analysis of the samples.

If possible can you provide of the method used by the third party testing laboratory? We would be happy to review their method and look for any areas of difference between the two methods that could lead to different results.

It is requested that the method is not forwarded beyond Edgewell without contacting TGA and requesting further distribution.

Kind regards

s22
