

Advisory Committee on Medical Devices (ACMD)

Meeting statement

Friday 30 November 2018 – Meeting 44

Role of the ACMD in the TGA's regulatory decision making process

The Advisory Committee on Medical Devices (ACMD) is a statutory advisory committee established by the *Therapeutic Goods Regulations 1990*. The committee provides independent expert advice on specific scientific and technical matters in order to aid the TGA's decision making and other regulatory processes.

While the advice provided by the ACMD is an important element in the undertaking of the TGA's regulatory functions it forms only part of the information that is available to delegates when they make a regulatory decision under the *Therapeutic Goods Act 1989*. It is important to note that while appropriate consideration will always be given to such advice, the TGA is not obliged to follow the specific recommendations and advice given by the committee.

It should also be noted that information about advice provided by the committee may not become publicly available for some time after the committee has provided that advice. The purpose of this Meeting Statement is to describe in general terms the matters considered by the committee at each meeting and for it to be available as soon as reasonably practical after the relevant meeting.

Update on matters where the committee previously provided advice and a TGA decision has been made

An implantable knee prostheses system, considered at ACMD 36, was included in the ARTG. Additional conditions were imposed.

A component from a reverse prosthesis shoulder system, considered at ACMD 42, was included in the ARTG. Some additional conditions were imposed on the entry.

There were no other TGA decisions made for items previously considered by the committee.

Overview of the medical devices referred for advice

At the 44th ACMD meeting the committee considered the following devices:

- A system to treat peripheral vascular stenosis;

- A steerable microcatheter;
- A breast examination system.

The committee considered whether the benefits outweighed the risks for the devices and whether adequate evidence has been provided to demonstrate safety and performance through compliance with the Essential Principles.

Further information

Meeting statements are made publicly available after each meeting.
