

# Advisory Committee on Medical Devices (ACMD)

## Meeting Statement

Monday 2 December 2019 – Meeting 52

### **Role of the ACMD in the TGA's regulatory decision making process**

The Advisory Committee on Medical Devices (ACMD) is a statutory advisory committee established by the Therapeutic Goods Regulations 1990. The committee provides independent expert advice on specific scientific and technical matters in order to aid the TGA's decision making and other regulatory processes.

While the advice provided by the ACMD is an important element in the undertaking of the TGA's regulatory functions it forms only part of the information that is available to delegates when they make a regulatory decision under the *Therapeutic Goods Act 1989*. It is important to note that while appropriate consideration will always be given to such advice, the TGA is not obliged to follow the specific recommendations and advice given by the committee.

It should also be noted that information about advice provided by the committee may not become publicly available for some time after the committee has provided that advice. The purpose of this Meeting Statement is to describe in general terms the matters considered by the committee at each meeting and for it to be available as soon as reasonably practical after the relevant meeting.

### **Update on matters where the committee previously provided advice and a TGA decision has been made**

There were no TGA decisions made for items previously considered by the committee.

### **Overview of the medical devices referred for advice**

At the 52nd ACMD meeting the committee considered a number of Orthopaedic Implants identified in the 2019 Annual Report of the Australian Orthopaedic Association National Joint Replacement Registry.

The committee considered whether there was sufficient evidence to determine that the higher than expected rate of revision is caused by the performance.

### **Further information**

Meeting statements are made publicly available after each meeting.
