

TO WHOM IT MAY CONCERN

Proposal 3 (i)

- This Proposal substantially alters the existing regulatory arrangements for business and will result in a very large initial one-off cost to our business and significant on-going costs.
- Transition time also too short.
- A better alternative could be to simply list the "product name" of the device on the ARTG entry and allow this information to be accessed by an interested person. This avoids the additional compliance burden on business but will allow anyone to see that a device is registered for use in Australia.

Proposal 3(II)

- This Proposal substantially alters the existing regulatory arrangements for business and will result in a very large initial one-off cost to our business and significant on-going costs.
- Transition time also too short.
- A better alternative could be to simply list the "product name" of the device on the ARTG entry and allow this information to be accessed by an interested person. This avoids the additional compliance burden on business but will allow anyone to see that a device is registered for use in Australia.
