Date: Thursday, 21 May 2020 2:19:31 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

An elderly relative for relief from mild pain and mild anxiety without harmful side-effects.

High prices would inevitably mean that it would be out of reach of many people who would benefit most.

Via pharmacies and other health practitioners including osteopaths, chiropractors, naturopaths etc. This would make it more freely available but also make sure people are getting adequate care and can be referred to a doctor if needed.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have tried CBD as a sleeping aid and it worked well.. I am very on board with having it available now for minor health conditions at a reasonable price.

Of course the price is important as if it is expensive a large part of the population could not avail themselves of the benefits of CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have heard testimonials from a considerable number of people who have been using low dose CBD oil for themselves or relatives to treat minor complaints eg stress, anxiety, IBS etc with excellent outcomes.

DescrThe price is important because many many Australians survive on an extremely limited income and having access to natural, non-pharmaceutical products which alleviate troubling symptoms of mild conditions is very important for improved quality of life.

CBD could be accessed through health food stores where perhaps a naturopath could advise the customer.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think it should be cheap enough for everyone that needs it to be able to access it whether they are rich or poor

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

DescrLower price = greater accessibility but I would not focus on price when looking into recommending clinical use. It is more important that the product is safe, effective and without adulterants than how much it costs. However, it should cost not more than is necessary to allow for safe manufacturing practices.

Via pharmacy, degree-qualified health practitioner (both orthodox and 'complementary' e.g. naturopaths and herbalists). It should be available to the public only after consultation with the practitioner/health expert. It is important that the public are educated about the difference between CBD and recreational cannabis products to remove the stigma and misunderstanding surrounding CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I have used CBD safely for sleep, joint pain relief and mild anxiety. It has always helped. I have friends who have used it for seizures and again it has always worked. There is plenty of research and evidence on how cbd is effective for a multitude of reasons.

DescrBy making CBD affordable more people should have access to using it for their chronic illnesses. There is no point having this product available for astronomic fees. Most people who need it are already spending too much money on specialists and healthcare appointments.

CBD should be available for purchase from qualified health practitioners at prices that are capped out so you don't end up with pharmaceutical companies charging exorbitant fees.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

I believe that it is good for a lot of people. It is natural. I have seen a lot of friends and family use it with nil ill effects.

The price needs to stay low so it is available to all walks of life.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Descr

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe there are many people who would benefit medically from CBD and the added advantage would be reducing, or eliminating, other drugs with undesirable side effects. Personally I have tried CBD with no benefit, but many others have.

DescrFor CBD to be of maximum benefit it has to be affordable. If people can't afford to use it correctly, the health benefits - or lack of - will not be correctly reported.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for stress, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I believe it would help reduce stress and spasms (not epilepsy). I have never used CBD but I have heard good reports from responsible people.

I believe the price will affect whether I was to purchase and use the low-dose CBD as while it may improve my wellbeing, I would not consider it essential at higher prices.

I believe CBD would be very beneficial and life enhancing for many people with chronic conditions.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD has been used throughout the world for minor (and more significant) conditions. It is a plant oil - not a pharmaceutical drug - and governments and health authorities should have no right to control its use.

The price of CBD oil is critically important. The price at present is high and out of reach many people who benefit from it most. It should be readily accessible for all.

Allowed to access freely online, off the shelf at pharmacies, health food stores.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have constant pain from chronic R/A. This inhibits proper exercise and sound sleep both of which would improve my life. It might also help to reduce the use of other medications which have long term health issues.

I am on a pension so could not afford a high cost. I think many people who would benefit are in the same position financially.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Very good experience with pain relief. Used safely in low doses.

Price needs to be affordable as older people tend to have more issues with health and less income. Australians should not have to live with pain that can be safely and inexpensively managed by CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have used CBD with pharmacists advice for anxiety. I have found the pharmacists support and advice to be very positive. I was proscribed CBA for pain relief by a local doctor.

I found the lower dose to be very effective for my sense of general well being and relief from anxiety from the medical condition I have.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I am very keen to try CBD to help with both my IBS and Endometriosis pain, I often have trouble finding medications that work effectively without nasty side effects. I have heard of great success stories in countries where CBD has been legalised and think it would be a great step forward for Australia and chronic pain sufferer's if it becomes available here.

I do think pricing should be fair for most Australians as there are many of us who experience chronic pain and would like an affordable alternative to prescription medication.

I would use CBD in a safe way and read the label and warnings.

The proposed change would provide an option to myself which is currently unavailable to me via my doctor. I do not wish to delve into the black market. I would prefer a regulated source of CBD. Neither myself or any members of my family have ever used CBD, but I would certainly be available to take part in any trials, if required.

DescrLower CBD prices would be better for me, because if it proved effective, I would be able to use it regularly. The price is important to me as I'm 64 and on jobseeker. The budget does not allow access through the current system, which I have researched.

The best way for the public to access a regulated source of CBD is over the counter at the pharmacy.

Date: Thursday, 21 May 2020 1:52:57 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrLower prices would mean that CBD would become a viable option. To explore for ongoing pain and sleep difficulties. These are currently managed with a doctor. It further options are needed.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I used CBD Oil when in the USA and UK last year and found exceptional benefits for overall health and mental clarity.

DescrLower prices would obviously make it more affordable for a higher proportion of the population.

Do not restrict to chemists. Health food stores should be one outlet. It is important to sell CBD Oils with Certificates of organic purity at origin and full strength authenticity.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrVery important..it should be readily available and affordable

If a scripts is needed so be it but it should be as accessible as paracetamol..

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Thursday, 21 May 2020 1:53:50 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrLow income earners need access too

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have never used CBD but have seen and heard of the positive effects it has had on a lot of people who have taken it for pain and other ailments.

A lower price would be better for all then it is accessible and affordable for everyone not just a few.

I think it should be sold in Health Food Shops and Pharmacies without necessarily having to have a consultation to buy it. There should be a well informed leaflet or flyer to accompany the product.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I would use CBD in a safe way and read the label and warnings.

I have anxiety, osteo arthritis and gut issues. I have close friends who are having great results

DescrI am a single mum and prices of medications can be crippling. Some medications on the PBS are cheaper but not as effective or have harsh side effects

Health professionals should be supportive of individuals choice of care. Many pharmacies offer all types of alternatives. This should also be available over the counter at my pharmacy

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have heard from friends and acquaintances locally and internationally who have used it to treat stress and anxiety that it's been a life saver.

I think pricing should be as affordable as regular prescription medication not more expensive to allow people to choose whether they take pills or CBD based on personal choice not price.

As we don't have marijuana legal at the moment then the Chemist or Health Food Store would be the easiest place for it to be brought.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The proposed change will be of great benefit to me having a pain condition & am unable to take anything more than OTC analgesics.

DescrLower prices will benefit everyone who needs CBD, providing it is of good quality or there's no point.

Only publish my submission on the TGA website with confidential information redacted. My name & address

I do not consent to the publication on the TGA website of my personal information.

Date: Thursday, 21 May 2020 1:42:07 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrSimilar to pbs drugs for the same conditions

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

People have utilised marijuana safely for hundreds of years - it is frustrating that a plant medicine be monopolised by big pharma but also a positive that it will be more widely available to those who need it.

DescrMany people who live in significant chronic pain are unable to work and live off disability pension therefore higher prices means that they are unable to afford this medicine - it is important that it be affordable to those who need it the most.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Health professional

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I don't personally have a use for it but for those that do it should be an affordable form of treatment.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Sole trader

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrToo many Australians are suffering with many pains where other drugs have been ineffective.

I need over the counter as access to prescriptions did you had a good through the Medicare model is inadequate.. Because this model is guided by too many regulations which make access impossible.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I would use CBD in a safe way and read the label and warnings.

I have never used it but I would like to have it readily available if I decide to use it. I have seen many videos and read many stories and know people that have used it and have shown great improvements overall. Other countries are already using it, I believe anything that gives people a better life should be used.

I am not sure about prices, however it should definitely have lower prices to be affordable to everyone.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I haven't used it personally but have heard and read information that it is useful for a number of conditions, including epilepsy and relieving chronic pain

DescrIt should be reasonably priced, as anyone who would need it already has some condition that requires ongoing costly treatment

It should be available as you would buy any other health supplements.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Consumer

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I work in a field that requires supporting people with varying degrees of epilepsy and through my research on use of CBD in other jurisdictions I know that it can be helpful in easing symptoms.

Higher prices would mean that many people, especially on low incomes or disability pensions would be unable to afford the treatment.

CBD should be widely available through pharmacies, supermarkets, other retail outlets and online. In the UK and the Netherlands CBD of varying strength is available without prescription in pharmacies.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I believe Australians who are in pain should be able to afford pain relief. Most of those in pain will typically be of a lower socioeconomic state due to pain restricting them to work less hours, therefore it should be affordable for everyone who is in need.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

I believe CBD oil should be widely accessible because of the almost immediate positive effects on patients not gained without side affects (if they even work) from mainstream medicine. Returning to natural holistic plant based healing allows the body to work with nature itself and not chemicals.

DescrThe prices need to be in line with current medication.

qualified holistic practioners not just GP's should be able to prescribe this for patients. so it is available not just through pharmacy.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

As a BC survivor I want to use CBD topically & internally. As a PTSD survivor I want to use it for stress & anxiety management.

DescrHigher will make it impossible for me to purchase & feeds the greed of those charging higher price. Lower prices are obviously a benefit for everyone. Australia is way too far behind what Europe & USA access.

Clearly the current system of government & greedy suppliers is not working. Not to mention the unprofessional way personal opinions of GPs in making it difficult for some Australians to access CBD- this is inappropriate power. There are many smaller suppliers who have been around for years & their products are tested by knowledgeable volunteers ... the people are already showing you the best way to access to the public!

Date: Thursday, 21 May 2020 1:40:08 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Descr

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My god-daughter suffers from depression and anxiety. She has suicidal thoughts and has made several attempts to take her own life. Access to quality CBD would assist her navigate her way through these teen years, and hopefully survive. I've seen amazing results on people with alzheimers etc, so why should they have to be conducting 'illegal' activities to gain access to a natural drug that assists them lead a normal life.

DescrA decent price indicates a quality product and appreciates the level of expertise from the manufacturer

Would rather buy a legal product than an illegal product

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD personally as it not easily/legally available in australia. I would very much like to try it for ocadional knee pain from an injury I suffered as a child as well as general anxiety and sleep assistance. My fiance has severe knee pain that prevents her from excercing as well as anxiety and trouble sleeping at times so I beleive that she would also benefit greatly from legal access to CBD oil.

DescrLow cost CBD would allow CBD to be available to all Australians regardless of their socio-economic circumstances.

I would like to see CBD easily and readily available to the public. It has proven benefits and has been used safely overseas for quite some time so I believe there would be little risk in public used while longer term studies are conducted.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The impact of the proposed change depends on which option is adopted. I have used CBD without pharmacist advice. The research I've undertaken indicates the aspect of 'safely' doesn't apply to the experience because ultimately there are minimal risks to start with.. My experience achieved excellent results !

I think lower prices would affect everyone because it would make CBD more accessible. I think the price of CBD is important for Australians because the public need to have an affordable alternative option to pharmaceutical products.

The most effective way for the public to access CBD is to totally withdraw it from any government regulatory systems. It is clearly apparent that currently the public are tentative of using CBD because of the legal stigma surrounding it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've seen it help so many people
It's a natural product and it should never have been banded
Freedom of choice

DescrStop making things so easy to grow and accessible too high for the average person to get

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have no experience in this feild however would love to try it. Suffer from pelvic congestion plus ibs. Terrible constant pain. Would love to try something new when not much else works.

DescrIf it is too expensive people who may really need it may not be able to afford it. However i cant comment on myself for the cost as i have no idea what you classify as a "higher price" . Obvioisly the more affordable the better so it can be easily accessed within reason.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

This product has been used throughout human history to successfully treat a multitude of health issues and support well-being. We the public deserve the ability to use this natural option over other more mainstream accepted, yet potentially more harmful pharmaceutical drugs with chemical compounds and side effects. Please consider the best way to introduce CBD into the market at an affordable price. I, like many others would struggle to afford CBD oil at its current market price. Thanks for taking steps in the right direction to making such a great product available legally in Australia.

I believe keeping the cost to a minimum would greatly benefit those in all socio-economic groups in the country. I would assume that competition would be the best way to do this.

I would use CBD in a safe way and read the label and warnings.

I think CBD should be made as affordable as possible, as any medicine or agent that might have therapeutic effects (however small) should be accessible to everyone regardless of income. As many of the purported benefits are for low level conditions (e.g. general stress or mild anxiety) many who might otherwise find some benefit from trialling use of CBD would be put off by an unaffordable price point, and thus would be excluded from the possible benefits to their lives

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It won't impact me at all I buy hemp seeds from Woolies for several months now and I was surprised at the health benefits I've felt since approx 25 GM's per day

DescrCommonsense tells I would save money to spend on food as the price of food has jumped since covid 19 if you didn't notice

See previous question

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

NSW, Australia

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have a loved one that is in pain every day and this pain also gives her anxiety. We both believe this would be an effective low cost treatment that could change her life.

DescrLower prices for CBD would be more affordable so more people could have access to the product. That need it.

The best way fir the public to access CBD would be that it should be freely available over the counter

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain.

I would use CBD in a safe way and read the label and warnings.

I am aware of someone who suffers from severe eczema and has problems with itching and the consequent desire to scratch. CBD acts as an anti-inflammatory and over time reduces the eczema to a negligible amount whilst providing great relief. The medical profession have advised that there is nothing that they can do to help the patient.

Descr

I consider that as a non-halucinogen it should be made readily available to adults. Ensuring a good product is the only government need and after that the product should be available without any hurdles at the retail level.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I would use CBD in a safe way and read the label and warnings.

Access to quality healthcare is a right for all people, and lower prices would make CBD more accessible to a wider variety of people, especially including people that live with chronic pain or anxiety that makes it difficult for them to work and therefore have lesser financial means.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Consumer

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I suffer from chronic migraine and being able to access this product would have a huge impact on my quality of life.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would not use CBD in a safe way and will not read the label and warnings.

I have osteoporosis, travel often and sitting for long hrs is very debilitating
My daughter also suffers with anxiety to the point she thinks she has other mental issues like over activity and short sleep that might be an aggravating issue

Easy access is important to make a difference .

Provided it is not only available from chemist it will be ok that the government also dictates approval of other companies to avoid poor quality .

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have been eagerly researching the benefits of CBD oil for many years. I am avid runner and fitness enthusiast and the recovery benefits associated with CBD are well documented and proven.

Low doses, Of non psychoactive CBD oil has benefits outside of athletic recovery too. CBD shad demonstrated excellent results on Mild stress and sleep issues which I also suffer with from time to time as well.

the benefit of having a natural compound readily available on the Australian market would far outweigh and perceived downfalls in my opinion.

Higher prices restrict access and often lead to sub quality products making their on to the shelves, this also increase the demand on the black market.

Allowing one particular industry to have a monopoly on the sale and distribution of this product will place it out of reach for the people who need to benefit from it the most.

Freeing up the market to compete against each other will help drive competition innovation.

I'm glad the TGA has decided to consult with the public on these issue and I look forward to seeing cbd products available at an affordable price in the not too distant future.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD up to now due to its unavailability. I would like to be able to use it in conjunction with other health products to help control pain levels of an auto-immune condition.

For the benefits of using CBD to be available to the public, a high price would seem counter-intuitive. It would need to be within reach of the average person, so those in need can benefit from its use.

I would be happy to access CBD over the counter from a pharmacy..

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've not personally used it but a close friend uses it with great results. His stress can be seen to visibly reduce and he's able to sleep better at night.

Pricing for medicines should always be as cheap as possible. Individuals with a lower income must not be excluded via a price barrier to entry.

Over the counter at a pharmacy is in my eyes the best solution.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

I have suffered from a chronic autoimmune disease for years (ulcerative colitis.) Reports from other countries where CBD is a legal treatment lead me to believe it will help manage pain, sleep and general discomfort to great effect.

I already pay for multiple medications, which although subsidised through the PBS, end up costing me around \$40 a month. On top of this I incur many other health related expenses. I believe we should endeavour to keep the costs of all medications at a minimum.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

There are too many people suffering in many ways and if it was at all possible that their suffering could be relieved by CBD they should at least have the option to research it and try it for themselves. I have heard good things and Australians should have access asap.

A lot of people with health issues might be on low incomes partly because of their health issues. Everyone should be able to afford CBD

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Consumer

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

As preliminary studies have shown, CBD oil can be effective when treating a variety of conditions alongside conventional medicine. Cost is a concern for most families, and due to the potential positive impact CBD oil can have on people's lives, it should be listed at a cost that is affordable and realistic

The public should be able to readily access CBD oil under prescription from a qualified health professional (including Naturopaths and Herbalists, as they are specialists in this field).

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

We have not had direct experience but have read of potential benefits

We have investigated prices and as pensioners it has been out of reach to us. A lower price would certainly bring it back as an option

I feel there should be some restriction on supply and through a pharmacist, without prescription, would be fine. They are aware of other drugs we have prescribed.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think there are many reasons why CBD should be available. It's been proven to help with chronic seizures, general pain and stress. Luckily for myself, stress is the only reason I would use CBD. As for my partner, he has IBS and has struggled with it for a while. Perhaps this could help him.

Price is incredibly important here because it should be accessible to all, not just the wealthier. Cost barriers are not ethical when it comes to medicine.

The best way for the public to access it would be a consultation with a GP, inform the person about ways to remediate their problem and ask them if they want to trial a CBD sample for their problem. If it helps, give them a card which can expire which is for a prescription with a dosage recommendation on it.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

Arthritis pain in feet has severely hindered my ability to walk.

No one that I know had used this preparation. Too expensive.

The benefits of lower cost would give many people an effective medication for hard to treat problems.

Listed for subsidised medicine on prescription.

Only publish my submission on the TGA website with confidential information redacted. Name and address.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Consumer

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

In my experience high quality CBD has been very effective in reducing anxiety and pain and allowing a deep, rejuvenating sleep

CBD should not be priced too high to make it out of reach for whom ever may want to use it. After all it is so easily grown and such a useful medicine allowing access to all who would like to use it seems logical.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

My mother has bad arthritis in her hands, and I suffer from chronic pain, anxiety and intermittent bouts of insomnia.

Paracetamol doesn't work for her, and I don't want to take the dangerous and addictive prescription drugs which are the only thing medical science can currently offer me in Australia. I am so scared of becoming addicted to these drugs that I sometimes choose not to take them, and instead suffer pain or insomnia to the point of not being functional, in order to avoid dependence.

If anecdotal evidence is any indication, CBD would improve the quality of both our lives.

I am on the Disability Support Pension, Money is tight.

The price point of CBD would directly affect my ability to use it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

In Switzerland medical cannabis is legal. I used it during my holiday for headache migraine, hot flushes and to sleep better. It really helps. My mum who is very sick and uses it for nausea and to sleep better. If it was available in Australia I would definitely use it.

It needs to be affordable for all Australian.

In Switzerland you buy it from special shops who only sell medical cannabis

I would use CBD in a safe way and read the label and warnings.

There is someone important to me who find relief from back pain following an injury. They prefer it to other pharmaceutical drug treatments which for chronic back pain can be quite addictive. I am glad he finds relief from his pain with as few side effects as possible.

Cost should not be a mechanism of control, it should be available as needed like ibuprofen. Since we are talking about CBD, it's not subject to abuse because its use does not produce a high.

I think it should only be available from pharmacies in a variety of doses from low to high

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe Everyone should be able to access CBD at an affordable cost. I have looked into it but it is currently way too expensive

Yes the price needs to be affordable for everyone

From health food shops or pharmacies

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe individuals have the right to access safe effective natural medicines that are TGA approved for relief of minor ailments to support better health

higher priced medicines prevent many from accessing good safe natural medicine

CBD should be easily accessible from reputable health product suppliers

Only publish my submission on the TGA website with confidential information redacted. name, phone number and address

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I would trial CBD, due to the amazing experiences of other people world wide where it is legalised. To enhance my own wellbeing.

If lower prices were available, I think more people would be willing to try it, to see if it helped them. It would save people money in the long term and improve the healthcare of the Australian people

More readily available, would save people trying to source illegally, and being able to report changes would enhance the safety for the TGA approval.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The less expensive the better. Having read up on CBD, it’s uses are quite broad and ought to be made available to everyone irrespective of their means. I don’t mean that quality or potency ought to be compromised though in order to make it cheaper.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

My neighbor would've used to treat his chronic pain and cancer. However he was unable to access CBD as the doctor wasn't available. My husband used as sleep aid. No harm was done by deciding his dose.

I heard that many Australians bought imported CBD for their family's treatment because Australian CBD was extremely expensive. (A few thousands/month)

We need more information about dose, source and quality.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

I know many people with cancer and people living with non-cancer pain. They NEED access to CBD NOW.
No More Delays!

The lower the price, the better! Meaning more people can get relief. This is very important for Australians and the economy because less people sick means more people back to work.

Just legalise it.

If available, I would like myself or my loved ones to try CBD for mild pain.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I personally wouldn't use it but as a health practitioner can see that it has its place in the treatment of pain

I think if pharmaceutical pain relief is available at low cost so should CBD

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I don't why we need to use synthetics that's it doesn't need to be copied just use natural ingredients it helps my mother with arthritis and all the other things that come with age but can't get reliable source and it makes her take to many pills which lead to other problems bring back all natural therapies stop the big pharma they make enough profit and out of billions they make none goes back into community being healthy doesn't make good profits

Because it should be cheap it grows wild can be farmed for almost nothing pensioners and lots of people need easy access

Wow neurofin and all the other statins do so much damage It's oil for Christ's sake after covid we need to wake up put on shelf at woolies etc I don't understand how this beaurocrasy still exists in this day and age

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Although I have never used CBD, if it were to become affordable and permitted for use, I would like to incorporate it into my loved ones' toolkits for managing painful eczema flare ups.

If CBD prices were significantly lower, my family would be able to access it to use for eczema relief. I believe it would open up an option for all Australians to access a treatment that they otherwise may not be able to.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD, however, I do research health products as I am in the Complementary Medicine field. I suffer pain from old accident injuries and prefer to take a product without side effects as I have found with most pharmaceutical drugs preferring to keep pharmaceuticals for times when they are needed the most and therefore may be more effective eg. extreme pain.

Of course the price of CBD should be affordable. There are so many people in pain for one reason or another. If it is priced too high, then it may only be available for those who are more wealthy.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My mother lives with Fibromyalgia, Osteoporosis and Rheumatoid Arthritis. She has tried many medications with little success and me and my siblings have to watch her suffer with very little quality of life. In discussions I've had with her, she would like to try this. She is 73.

I also have Fibromyalgia, chronic Fatigue Syndrome or ME and PTSD. I struggle with great pain, chronic insomnia, and the inability to relax because of hypervigilance. I would like to see this product made widely available to people like me and my mum. For those with conditions such that I have listed, we all use many different medications in our "toolbox" of coping strategies, and this should be one of those.

Lower prices for CBD oil would increase my ability to access it, as I'm on Disability Support. This is the case for many Australians, therefore lower prices for all Australians is imperative.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I know of many people personally who have tried/used it with great results. If it doesn't contain THC I don't understand why Australia won't make it legal for personal use. It is much safer than any pharmaceutical drug on the market!

Absolutely needs to be low cost, so that it can be accessible to everyone who needs it.

The more you try to control things like this, the more people want it. It has been legal and accessible in many other countries for quite a while and has not impacted negatively. I believe it should be available to purchase online and via health food stores.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I answer not for me but for my 68-year-old mother. She has continued localised pain which means she has impacted mobility and cannot sleep properly - which leads to further stress and anxiety. She has suffered for years with this and even those in her conservative circle of friends have advised her to seek alternative relief, based on their own experiences with CBD. I strongly believe that people suffering from various conditions will benefit from CBD's availability without fear of consequences- and also lessen the burden on our health system

Profiting from sick people is reprehensible; however, if the pricing has to absorb the cost of testing, etc to justify the eligibility of CBD for Australians then people who can will pay it. If prices don't reduce once accepted as a valid medication then I would expect Medicare to absorb the difference as with other medications

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have trusted sources overseas (medical professionals including doctors who use and recommend cbd oil to support health and wellbeing and to treat minor health conditions

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

No experience so far but lots of research and reading about other experiences for anxiety, migraine, MS, cancer

It should be accessible to everyone with a condition to get some relief

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD safely for the pain of pulled muscles and my experience was a diminishment of the pain without the worry of chemists advice re conflicting pain medications or concerns as to the damage that these pain medications do to the liver/body.

I am on a fixed income and prone to health issues. Higher prices for CBD oil made it difficult and then impossible for me to obtain CBD oil to assist my health, therefore, lower prices for CBD oil, in not putting a price point on wellbeing, would have been important to my past and future health and wellbeing.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Tuesday, 19 May 2020 7:42:37 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It would provide an alternative way to treat some minor conditions like stress, anxiety and sleep disturbances without the negative side effects and health risks associated with long term use of pharmaceutical drugs.

I think a mid range price would be appropriate to avoid negative, unintended consequences or misuse.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have a friend who uses cbd oil for mild anxiety and finds it very helpful.

Cbd oil ideally will be available at an affordable prices for any adult who chooses it to be an option for them.

It the price is high it becomes unreachable for many who will have great relief from using it.

It would be great if the TGA would make CBD oil accessible while studies are done on the health benefits.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Higher prices would prevent access to CBD for a lot of Australians who would greatly benefit from it's use. With higher prices it would mean that they still would be unnecessarily suffering from ill health. Lower prices would give a lot of people a quality of live back.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have seen the positive effects of medicinal CBD
I would resort to importing questionable quality if it were allowed.

It would be the perfect solution if high quality CBD were available at Pharmacies. In Victoria

I think the price should be lower when requested by prescription.

Make the growth of organic plants containing CBD legal.

Only publish my submission on the TGA website with confidential information redacted. Do not display Email

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Access to full spectrum cbd would be helpful for many things, from pain to sleep. More natural than you can get from pills

Affordable but access is the main issue

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website with confidential information redacted. Name

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not had experience with CBD, but have a couple loved ones who have conditions that research from other parts of the world have stated CBD would greatly improve quality of life. In regard to less serious matters, the de-stressing and calming properties of CBD would be of great benefit to the general public's quality of life

The price would be an important consideration, as making the prices too high would discount an entire proportion of poorer population who may require it. I think the prices should be low enough that it can be reasonably accessed by all socioeconomic groups, but perhaps not low enough that it could be regarded as a cheap drug to abuse. However, if there is no way to negotiate a middle-mark price point due to how it should be manufactured etc., definitely a lower price point would be much preferred over a higher. Healthcare should never be in the position to be considered a luxury item.

Whilst I agree that it should be controlled in regard to dosage, intent etc. these should also allow for people without serious medical conditions as in general public with stress, sleep, anxiety concerns etc.

also, the parameters should not be just set to include adults as there are many instances with children with conditions who benefit greatly from CBD, of course in the case of children it should not be taken lightly and considered thoroughly, but they should not be discounted entirely.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Affordability is the biggest issue when it comes to health products. CBD has been proven to work for so many ailments and illnesses and many people with these afflictions cannot afford to allocate a lot of money for beneficial natural products which in the case of CBD could potentially really really help

Private enterprise that is regulated to some level.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I haven't used CBD oil but have read for years about the multitude of health benefits and strongly believe it should become available in Australia for medical issues

I think it's not good if it's cost prohibitive. Why should a rich person be able to receive health treatment and not the poorer.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

I have been using CBD as an adjunct with the help of other products to combat my illness for 2 years with fantastic success. I am looking forward to the day when I can source it locally.

The price of CBD should reflect the fact that it is inexpensive and easy to grow on a commercial scale. It should be affordable by all and widely used and available.

I see no reason that chemists should not have full access, as well as the medical industry.

I would use CBD in a safe way and read the label and warnings.

I have used CBD when travelling aboard. It has incredible positive health benefits without any negatives elements like pharmaceuticals. It's doesn't have the psychoactive component so I'm unsure why it is even considered unsafe except it will likely take market share from pharmaceutical companies. I use it for general stress and sleep. I also use topically for skin conditions.

Everyone should be able to afford a quality non nature healing solution.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

People on disability support pension needing it and being able to afford it with rising costs of living.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD to aid in sleeping and it is a wonderful, safe and effective tool

Higher prices makes CBD unaccessible for many who may need it. Higher prices make it elitist

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Cbd is widely used for inflammation in many other countries and has mostly positive reviews. It is proven to be safe and effective and the only reason it is not available here is because of stigma

I think it should be priced fairly and with an open market this should be possible

Let the people make their own choices and get out of the way

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

With my doctors approval and guidance id like to try low cost CBD oil

Not having to mortgage the house to afford the oil should be available to those who need it

With guidance by dr or pharmacist CBD oil has proven effective in lots of studies but is not affordable to many people

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

CBD OIL has proven remarkably effective

For many different conditions and i would very much like to try it to see if it elps my inflammatory disease my doctor suggested it would be worth while but at the present price theres noway i can afford it .im hoping that the availability and cost will be reduced so we dont have to jump through hoops To qualify for access and go broke to purchase

it

I would use CBD in a safe way and read the label and warnings.

No I have not used it but wish to try, I have read and researched the benefits and believe it would help many people.

We need to make it affordable so that those who are most vulnerable and cannot work have access to it immediately.

We need to make this available as soon as possible, just like many other countries that have had great success and no side effects that have been recorded, not like much of the other medicines available.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe CBD oil should be widely accessible because it appears to be safe and effective for minor health issues. Other plants and herbs are available and so should CBD.

I don't think the price is an issue for me. If it works I would purchase it.

CBD should be available to Australians at a reasonable cost and it should be easy to access. There is so much positive research that shows it is effective.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Everything I've been told to avoid referencing. Mental health issues, healthier alternative to pain medication and helps to stimulate appetite loss from other illnesses.

I think it should be priced in a way that makes it affordable to everyone who needs it for a better quality of life.

I think it needs to be in a place where people can go and get as much information as they need to make an educated decision if CBD is right for them or a loved one.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I am 37 years of age and have suffered with rheumatoid arthritis since my early 20’s. I have used cannabis products as effective pain management many times over the years. I do feel that the oils are effective but not the best form of medicine to administer. A CBD capsule or tablet would be ideal, taken as a substitute or combination with Panadol. In a similar way that codine is combined with Panadol for panadine.

Lower prices would provide access to more people that need it, however it should not effect quality. Perhaps a subsidy of the medication would be best.

Subsidise higher cost, higher quality medicine

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

If I can access quality, affordable pain relief for my disease, I can stop using prescription medication that is toxic and addictive.

Currently, prescription cbd oil is \$200 for a month's supply. The addictive poisonous prescription pain medication I take is around \$10. It would be nice for the government to provide an affordable alternative and not be forced to use addictive drugs.

I would use CBD in a safe way and read the label and warnings.

I believe cbd should be available at a lower cost to more people. I have suffered for many years with IBS, chronic pain (Endometriosis and fibromyalgia), as well as migraines. I currently use prescription medication which has many side affects. If I was able to source high quality CBD oil, I can trial whether this may help reduce the severity of some of my symptoms, without the side affects my current medications cause. There are many people with illnesses who may benefit from such a product being widely available for a reasonable price.

If the price of CBD is higher it limits the amount of people able to trial, especially those from lower socioeconomic backgrounds. I am a mid range income earner, and with my current doctors appointments, specialist, current medications, massage and chiropractic, I already find treatment extremely costly, and it does have an impact on everyday living and other expenses. If the price of CBD was incredibly high I would be less likely to trial it, as I most likely wouldn't be able to afford it on top of all the other treatments mentioned.

Although I do believe in monitoring dosage, and health benefits, I think it should be more widely available and accepted as a health treatment, rather than a taboo elite product which most can not afford. The process to be able to get CBD should be simplified and sped up for those who need this product.

i would you use CBD to see if it helps with headaches, anxiety and sleep

as a pensioner i cannot afford higher prices. no medication should be expensive as it is for health and well being. Higher prices would prevent me and many others from getting access to CBD which may have the potential to relieve symptoms. Health care that is not main stream pharmaceutical is far too expensive which is totally unnecessary, this should not happen to CBD

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website with confidential information redacted. do not publish my name or contact details

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have dealt with on going pain issues due to injury for over 7 years. Would dearly love to come off the tramadol I take twice daily.

Affordability is hugely important otherwise what would be the point if it's more expensive than the pain relief I currently take.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD oil is currently expensive and risky to purchase. The benefits for anxiety and general wellbeing are well studied overseas, and should be taken into account when deciding on efficacy in Australia.

High prices make it difficult for people to access higher quality products. It also allows scammers to enter the market, making purchases a risk.

Online ordering or in stores.

Only publish my submission on the TGA website with confidential information redacted. Name

I do not consent to the publication on the TGA website of my personal information.

CBD is a much more natural alternative to current medications used to treat mental disorders and would be a useful and powerful alternative

It needs to be accessible to people of all socio-economic backgrounds it wouldn't be fair to have it extremely overpriced

At the pharmacy or naturopathy stores

Its absird that we need a script for CBD products! It dosen't get u high people!!

Whats the problem? Just slap a label on it similar to a bottle of poison that warns you not to drink to much and let ppl get on with treating themselves safely.

Its not very useful if it costs a lot.

Legalise all cannabis and hemp products to start with. The war on drugs is a total failure..

I would use CBD in a safe way and read the label and warnings.

For me the issue is actually more about how much control we should have as free citizens. The government treats us like little children by forcing such issues as vaccination for everyone (when some people clearly have negative outcomes), and not allowing CBD (when clearly many people benefit from using it).

I think the government should treat this issue the same as alcohol - which causes far more harm to individuals and society, and smoking - also harmful in it's own way. The government has sponsored much advertising over the years to educate people on the dangers of these substances. It allows us to be free people (grown-ups) making informed decisions. But suddenly on the issue of CBD (and other issues) it treats us like children and gives us no choice whatsoever!

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD SHOULD BE READILY AVAILABLE FOR THOSE THAT CHOOSE TO USE THIS NATURAL PRODUCT FOR WHATEVER HEALTH CONDITION THAT PREVENTS THEM FROM LIVING A FULL PRODUCTIVE LIFE

Either chemists or dispensaries

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress.

I would use CBD in a safe way and read the label and warnings.

I have personal experience of a huge reduction and ease of pain from multiple injuries with out side effect, effecting other medications or addiction/ withdrawal issues. Far more effective and less damaging than Pharmaceutical products.

This also includes use to manage anxiety better than most pharmaceutical products

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD is effective for pain, especially nerve related pain which in turn is an aid to better sleep. Given that pain is reduced and the quality of sleep is enhanced, the effect on overall wellbeing is considerable.

Pain and sleep issues effect people of all economic strata thus expensive CBD would be limited to the affluent, thus not equitable.

From a Chemist would be the safest and accessible.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Have been on cbd oil last year was very effective in relieving back pain and also helped with anxiety my only problem was the price was ridiculous when you added in consultations + scripts approval and then the actual price of medicine.

Would be able to afford it again if the price was reasonable would improve the quality of my life.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

There is already quite a bit of research indicating the positive results with CBD for many mild conditions.

We have medical conditions where we are allergic to many standard pharmaceuticals so we are very eager to get easy access to CBD for our own health management.

We would love to have the hybrid option so that we could give reliable feedback and be able to access the CBD options easily without having to prove our need to a pharmacist who may not be suitably educated about CBD or our medical conditions.

I am a pensioner so I need to access CBD at the lowest cost possible for myself and my family members.

No-one should have to pay inflated prices for something that is natural that works and has low risk.

I think it should be offered OTC in any suitable retail and online shop.

Only publish my submission on the TGA website with confidential information redacted. name., email, telephone number, address

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Monday, 18 May 2020 2:55:37 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've heard first hand accounts from others regarding how beneficial CBD can be for controlling anxiety, back pain and malaise. Formerly, I would use Paracetamol with the 10mg Codeine added for serious pain/headaches and chronic back pain. The Codeine worked almost instantly. That preparation is no longer available without a prescription so now I use nothing and just put up with the pain as Paracetamol alone does nothing to relieve it. Some days are very trying indeed. That pain can be relentless, Yoga helps a little but I'd like to have the right and opportunity to try something like CBD which I believe would be less toxic than Codeine was on my liver function. My lower back pain has been from prolonged physical trauma inflicted by an ex husband. My brother has acute back pain from a vehicle accident. We should not be forced to relive these experiences through pain if there is a means for relief available.

The higher the price, the less I would use it. I would buy it and consume very sparingly. My income is difficult enough to stretch as it is.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

While I don't have personal experience with using CBD, I've heard many accounts of its benefits. Because of this and my opinion that there are many health benefits of CBD that are yet to be documented, I believe CBD should be readily available for those wishing to utilise it.

The lower the cost, the more accessible it will be for the average Australian. There's no good reason I'm aware of that the cost of the product wouldn't directly relate to the cost of production.

Lift legal restrictions on plant based medicines and increase information about their safe use.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I think it should be put in at a market price there is currently nothing on the market i would happily pay between \$160-\$180 per bottle

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Research from the US indicates that cannabis would greatly assist people with my medical condition where there is no cure or treatment apart from surgery and opioids. I believe the use of CBD oil or similar would help manage my symptoms and allow a somewhat normal life without the awful side effect from opioids. I think it needs to be affordable for everyone, and accessible otherwise there is no point - being sick is expensive enough

I would not be able to afford it without the CBD being on the PBS, and I think this will be the plight of many Australians. Being chronically ill means doctors appointments, usually multiple, medications, other treatments and time off work which puts financial pressure on people meaning CBD would need to be affordable.

Train more doctors in CBD and its benefits

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe high quality low cost CBD should be available now. I would use it for my family but I also support many Australians through a national health charity and they are at significant disadvantage due to the high cost and prohibitive restrictions. Most people are safe and responsible in caring for their health, this plant is a human right.

I believe the current exorbitant cost is absolutely outrageous and a pharmaceutical rort. I am a former triple certificate ICU nurse, I fully support integrative medicine - best of modern medicine and natural medicine. Give the power back to the individual person for their healthcare choices. I support SO many people who'd have relief in their chronic condition if the price didn't exclude them from access.

CBD should be decriminalised and the extensive overreach of pharmaceutical controls lifted. It's our human right to have access to this plant.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe access to CBD should be available to everyone, easy to obtain and at low cost.

I believe that a low price point would make CBD readily accessible for people to experience the benefits. It may also ensure adequate dosage was possible, when needed for chronic conditions.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD helps to ease sleeping troubles, anxiety and stress. It is such a good medicine to use for multiple issues and should be readily available for everyone who needs to use it

Australians need to be able to access this at an affordable rate. When one is on a limited income with no financial assistance from the government there should be no barriers stopping the purchase of this important medicine that is cheap to produce in reality

The growth and supply of CBD will create jobs and a healthy economy. Opening up dispensaries for people to go and select the strain that best suits them and their needs will make it easier for people to access the product in comfort, with the right advice from employees at the dispensaries

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

A lower, more fair price would be more beneficial for a lot more people who will be able to access CBD and will reap the rewards from the health benefits.

If the price is too excessive, people who could benefit from using CBD will not have access to it and thus impacting their quality of life and could possibly leading to theft in order to gain access to CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I am 69 years old and desperate for pain relief from severe chronic pain (treated so far for 20 years by specialist and GP), currently not responding to strong prescription meds. I have been on the verge of applying via TGA approved sources for past 12 months, but costs prevent me from being confident that I could sustain the purchase of the CBD product. I feel totally disadvantaged that this is a natural product freely available in so many other countries, yet here we are considered criminals for wanting relief to live a normal productive life.

I am severely restricted by income and it is the only thing holding me back from applying via current TGA approved methods to have CBD prescribed. I have been told I would have no problem qualifying under current guidelines.

My only other concern for using CBD issues with driving. I do not want to give up driving and whilst I understand it is the THC product which is not to be included in this scheduling, I think there should be some re-assurance given to patients who use the new down scheduled product that they will be able to drive without re-percussion.

Only publish my submission on the TGA website with confidential information redacted. Name, address, contact details of any kind.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

No advice from anyone. we researched on line. We have used it to treat my husband glaucoma. It is known to decrease stress and take the pressure off the eyes. Problem was he could not secure an on going supply and was not willing to tell doctor so it could be monitored. Eye drops are Beta blockers and have other side effects :-///. CBD is a natural treatment, non hallucinogenic. Doctors use to prescribe it for a huge range of diseases and illnesses....

If there is a monopoly, there will be high prices. No one wants to pay high prices. If it is a natural product it is worth spending the money for a drug free solution.

Just like in California. We walked into a shop and bought it. No fuss, no bother. No high prices. Same as selling alcohol, you have to be of age to buy it. No nannies needed to hold our hands or check the dose :-)))))).

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Have never touch any drugs if such, however it's been legally given to my own mothership suffers from Dementia, has been bed ridden for over 3 yrs and after only being administered 3x days by mouth, within a week major improvement was seen and 3 weeks later mum was able to seat on a wheels chair with support and also personally use the hose to water the flowers herself without assistance holding the hose. Shows that if some countries you can freely walk in and buy it why wouldn't Australia have it by now without all this fuss. We humans, we should hve the right to chose what we out into our mouths and medical marijuana isn't harmful, in contrary it's been more than proven that provides a better and higher quality of live. I am against elicited drugs, however medical marijuana isn't such, so stop with the burocracia of feeding the medical duly stem and look from this aspect: if you own child was having fits all day long and you had a choice to medicate tables or a couple drops of safe medicinal natural oil, what would you rather?

How come in some parts of Australia you can grow marijuana for personal use, but selling a safe natural oil seems to be such a major headache. It's wrong, the rules should be for all. WE ARE ONE COUNTRY, behave as such. Make marijuana oil legal ASAP, I too suffer from constant back pain and headaches, cannot wait to try freely from judgement but rather my own choice.

Only publish my submission on the TGA website with confidential information redacted. YES TO MARIJUANA OIL ASAP

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Natural occurring medications are my preference over artificially composed compounds where available. Experience with mild pain relief and physiological benefits while overseas where legal.

Would hope affordable supply would be available as all Australians need equal access to medication

Put illegal suppliers out of business by making legally available with gst applicable. Liquor stores or dedicated dispensaries with an RSA style approach.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Friday, 22 May 2020 11:02:37 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I live with low grade pain every day which inhibits me from being able to exercise freely and therefore I have less ability to manage my stress. Changes to the TGA restrictions on CBD would give me the opportunity to try something like this to reduce pain and allow me to exercise and manage stress better.

I think prices should be moderated
ot allow for fair access.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Suffer fibromyalgia

Needs to be affordable

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

Yes, most definitely used for relief of chronic joint pain due to arthritis and sometimes for persistent insomnia during stressful times. The CBD oil also contained Tumeric, Black Pepper and Echinacea. As a retiree the cost often prevents continual everyday use and therefore ingested only as required when pain becomes unbearable. Sourcing product is also difficult being that it is not readily available through health stores or pharmacies.

Only publish my submission on the TGA website with confidential information redacted.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

CBD is imperative to human health , supporting and restoring homeostasis in the body. This plant medicine has had 100% positive results for me

It doesnot need to be expensive

Make it widely available and get everyone off pharamcuetical drugs

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

It should be at a price that is affordable for everyone. If not you will find people that will get it from unreliable sources

It's should be purchased through pharmacies

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I support the legalisation of CBD oil, particularly in relation to management of chronic pain.

A few people I know have chronic pain and don't want to use medication that either isn't strong enough or has harmful side effects when used. CBD oil would allow them to treat this pain without any side effects and in an effective way.

I think that prices should be low enough and reasonable enough so that everyone who needs to access it can.

If this drug becomes legal, it should not just be a case that the wealthy are able to access it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I know a large number of people that are having great results with CBD and other cannabanoids. For example my aunt has crones disease and she has her life back after a ratio of full spectrum cannabis oil heavy in CBG, CBD, CBN and THC. The reduction in chronic pain was vast, the sleep / rest dramatically improved and digestion was normalised. With all of that going on because she felt way better and had a new found hope her anxiety also subsided. And this is just one example. WE NEED THIS!! Now more than ever! It just the right thing to do and can help improve and save countless lives with next to no risk. I am a qualified landscape gardener and would love access to help with my lower back pain. Thanks for taking steps to allow us to access this.

Because of the ability to use tgis as an anti inflamitory, for prolonged use and not have any negative impact on my gut health i would pay around \$150 per month. More if i had too though.

Online, via post and i like the idea of going to a dispensary and getting the full backstory on how and where my medicine was grown. I would really like to support smaller local growers as oposed to big pharmaceutical that i DO NOT TRUST!

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've not personally used it as it's never been available to me. But my mother in the UK has, she's suffered with chronic pain for many separate issues over the last 20yrs and she says using it has changed her quality of life for the better.

This shouldn't be used as another way to take money from the people. This is an opportunity to something good for society and have it available at cheaper prices so more people can afford to raise their health and quality of life, instead of feeling hopeless and spending what little they have left on things that make them less healthy.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD for pain relief. I was able to reduce the amount of other pain relief medications and found it helped me to feel much better.

My wife uses CBD for anxiety and it works well. I have also noticed a dramatic improvement in her response to stress.

CBD is non toxic and has long been consumed by humans. It is obviously very safe.

CBD should be made easily available for people to try like any other over the counter medication.

CBD is easy to produce and as such the price should be relatively low. Pharmaceutical companies will only drive the price up with number studies to maintain high profits.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

My mom's cousin in Thailand and my father in law in Australia were diagnosed with cancer around the same time (3 years ago). My mom's cousin has been undergoing conventional treatment and using CBD oil with great success (for appetite loss, stress and pain management). Her physician in Thailand recommended it as complimentary medicine. My father in law was undergoing similar treatment but none of his doctors recommended anything outside radiotherapy, chemotherapy and standard pharmaceutical drugs. None of his doctors in Canberra offered to help with his loss of appetite, stress and anxiety. No doctors cared about his recovery, his quality of life, his physical and mental wellbeing. They only discussed "cancer treatment". His health deteriorated very quickly and steadily. Sadly he recently passed away :(

It should be subsidised under PBS.

Make it accessible and affordable to all.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD saved the life of my friends daughter who HAD an “untreatable” form of epilepsy.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

My nephew has severe anxiety and injuries from a serious car accident that resulted in heavy pain medication being required around the clock and marijuana use to help ease both pain and anxiety. He has been using the cbd oil and is now off pain meds (which were having nasty side effects) and marijuana use (which cannot be certain what type it is and who or where exactly it has come from) all of which left him in a sedated state and not being a functioning member of society. He has now started his own photography business and his life has been turned around BECAUSE OF THIS OIL! He now has a second chance at life!!! Please make this accessible to people who need it and dont make them jump through fire hoops to get it!!

The price of any medication, if too high therefore becomes unattainable to the working class Australian. Most people suffering in some way generally end up not being able to work, therefore cannot afford overly priced medication, resulting in a domino effect on society. People in pain etc WANT to be able to be contributing members of society...but they need medication like this to help them do so. Making it unattainable financially ruins this.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe CBD should have lower costs and be affordable to all Australians including myself so that it is accessible to everyone. As many people who it can help are of lower income as their mild health conditions can effect their employment and therefore their income to be able to afford the costs of living as well as their access to CBD. I believe CBD oil should be widely accessible. Many Australia's already have done their research on CBD use for their conditions and have spoken to people from other countries where it is widely used and available over the counter and at specialised CBD stores. And where there is already a substantial amount of knowledge in regards to strength and best methods of application for different individual needs and safety. Many Australian's would be interested in taking it for their mild health conditions, including but not limited to, pain relief, stress and anxiety which would help them to live a fuller life and be more employable, Therefore putting more money back into the system and being of a greater benefit to society. Many Australian's experience negative side effects to other options available for relief of mild pain, stress, and anxiety as well as other mild conditions and require easy access to safe CBD. Preferably Organically Grown.

The best way for the public to access CBD should be over the counter from a variety of sources including health shops, pharmacies, small businesses and market stalls as well as directly from the suppliers and growers. People should be able to talk to the growers directly to understand how their CBD is grown and processed and the unique characteristics of the plant. The Public should be able to access CBD grown from organic and biodynamic Australian farms free from synthetic ingredients.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have one loved one who has used CBD oil with success to assist with pain after root canal work. They are sensitive to paracetamol due to stomach ulcers and found this very helpful as an alternative. Also being able to place oil at the target area.

I have another loved one using CBD oil currently to treat mild anxiety and they are finding their sleep and overall mood has improved noticeably.

While I would not be affected, I would think it is obvious that the price of CBD oil will affect the potential for Australians to access it as a medicine.

I feel it should absolutely be made available at a reasonable price, by which I mean one taking into account manufacture costs etc. but NOT adding on costs to act as a deterrent or for excess profit.

I feel a consultant well versed in CBD oil uses, dosages etc. to consult if people wish would be tremendously helpful at selling points, be that in pharmacies or separate store or other. Having ready access to information for the public is important for normalisation as well as to increase education and lead to increased and better consumer choices.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

In The Netherlands CBD is freely available in every chemist. To my knowledge there isn't any case of misuse or side-effects. It is an excellent alternative for painkiller like panadol, without side effects.

After a bicycle accident with broken bones in Holland last year I used CBD, with great pain relief without getting sleepy or drowsy. CBD after all is just a herbal extract, which should be freely available over the counter.

A 20ml bottle should not cost more than AU\$40.- at the most. I am basing this on the current prices in The Netherlands, where it is available for a reasonable price to the general public.

CBD is a healthy herbal product, certainly not as dangerous as tobacco and alcohol...

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It could help with anxiety and it does not seem to have any negative effects.

Lower prices, more available to everyone.

At any store or pharmacy. Warning labels are ok. For any adult to use. No prescription etc needed.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not been able to use CBD oil but I would like to based on the reports and studies coming from overseas of its success reducing neuropathic pain

Higher prices may mean many Australians miss out on pain relief, simply because of their socioeconomic status. That's discriminatory.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I suffer with arthritis, mesh injuries, sciatica, crohns and interstitial cystitis. I have ongoing anxiety and pain from the mesh implant and sciatica and I know that CBD would help relieve my symptoms. .

We need prices that are affordable for all australians. Most people suffering with issues that CBD would help are now normally incapacitated, on pensions, reduced hours etc.

It needs to be purchased through proper channels obviously, but they needs to be regulations on the prices as some businesses will exploit.. It should be purchased from either a chemist, health professionals etc.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have successfully used cbd accessed via tetra health Australia consultation with cannabis nurse, then a 1 hour appointment with a doctor then personally prescribed recommendation.

It is important to have consultations as there are a lot of different strains to treat different conditions.

I currently pay \$190 dollars for 30mls

I know a lot of people cannot afford this and I am sacrificing other things to make sure I can access my pharmaceutical grade CBD. I am not sure how it can be lowered in cost but I do know cbd has incredible ways of creating homeostasis

Having nurses and doctors trained in cannabis treatments

Only publish my submission on the TGA website, do not publish my name or any other information about me.

There are kids all over the world damaged by pharma which are finding it harder and harder to get CBD and now pharma wants to make money off of this too, disgraceful,

If you have a loved one that needs it price doesn't matter does it.

Maybe health food shops could sell it, better than pharma getting their dirty lil hands in it.

I would use CBD in a safe way and read the label and warnings.

I have not tried CBD oil but I know people who use it to manage pain with great success.

It is known that nearly half of Australians living with chronic disease, depression, anxiety and other health conditions have skipped medication or therapy - and this includes CBD oil - because of the cost.

It is also known that those with chronic conditions are more likely to have lower incomes and less wealth because of the effects of their condition and their ability to participate in the workforce.

If the TGA proposal was to come in to effect, the product would remain inaccessible for many Australians, namely the ones who need it most.

I believe CBD oil should be reasonably priced and accessible to ALL Australians.

I believe CBD oil should be available from a chemist, private dispensary or shop without a script.

CBD is a Natural compound and should not be patentable. Therefore it should be made available at a lower cost particularly to those who most need it and may least afford it.

The TGA should work the Natural Medicine Industry and especially accredited Natural Health Care practitioners in enabling evidence-based access to CBD

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have heard of people and read many studies on the benefits of cbd oil but have not tried it myself.

Friends that have tried it report good things so I have no doubt that it could benefit many people in many ways. They have used it on advice from independent wholesalers as per their instructions, with advice on how to vary the dose as required.

The fact that humans have cannabanoid receptors in the brain tells me there is a natural affinity to this kind of natural medicine.

And given that pharmaceutical drugs aim to replicate nature and herbs, originally starting from nature and then being developed in a lab, I can't see this could be anything but positive.

It would be a matter of educating peoplr, which I'm always keen to assist with.

I think keeping the price of cbd oil relatively low will make it affordable and accessible to Australians, especially in the wake of the recent health pandemic.

I know of several companies that make a reputable brand of cbd oil, often MLM companies. The benefits can be spread through word of mouth instead of expensive advertising, keeping the price more accessible. Again, it is about educating the public.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

It will most definitely and a absolutely change my life for the better as I have tried it overseas, ALL and I mean all of my existing wat I call chronic pain, anxiety, among a numb

Constant pain and discomfort for most of this life from young number of different things all emotional, physical and spiritual aspects of my life , so I did what I needed to do to get those two started and continuing healing and bettering the CBD for the first time i found something when I first tried it overseas and I believe from my own experience this is the missing link for my physical chronic pain that I still have today at 34 yrs old since around 8yrs It was shitty being always in some form of soreness from a number of my reasons till now CBD is key it completely and finally made me whole in life and so much more .thanks for listening ...

As a medical professional (radiographer) and having done plenty of reading on the subject, there seems no good reason to disallow access to this safe botanical medicine. Hurry up and legalise. Thank you.

The lower the better.

Large, wholesale farms can make production cheap. Plenty of jobs.

Just hurry up. Find a successful model from a more progressive nation overseas and emulate.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I and/or my loved ones have used CBD either in Australia or in other countries for anxiety, pain, or made into a cream for topical pain and inflammation. It is safe and effective.

I believe in access to quality lower priced CBD because individuals are unique and the same dose may not work for all, therefore pricing may become an issue for some people requiring higher doses.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for help with restful sleep, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

I am not well and have several autoimmune illnesses which have gotten worse over the years in spite of GP and specialist treatments. I've spent a fortune on natural, alternative remedies which have given some relief. I've run out of alternatives and would like to try CBD in a safe way for especially pain relief.

As a senior on a pension, a reasonable price for CBD would be appropriate. A high price for CBD would mean senior pensioners would have to cut back on e.g. food or heating in winter to pay for the medicinal CBD.

Best access point would be at a pharmacy whereby the pharmacist could advise the customer re any side effects, a record could be kept so that misuse if any could be noted.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I discovered CBD whilst in California, it was readily available and affordable. I was provide md advice upon purchase, I was amazed how much my anxiety and stress levels improved, to my surprise my focus was also enhanced. These clear observations established an awareness that this product was to be taken with respect and not without caution. I have since encouraged friends and family to try CBD to treat various concerns and have found the feedback to be consistent - generally well-being is improved and control with regard to dosage occurs naturally.

I strongly believe the price should ensure accessibility to all social demographics to ensure it's competitive with other highly affordable treatment options

As above, CBD offers an alternative natural treatment option for may ailments. Considering potential reduction in the use/abuse of other accessible substances I believe it should be readily available and financially accessible to Australians as possible.

We have not needed to use CBD however I know many people who have benefited from its use for chronic pain, insomnia, anxiety, seizures etc.

Price should not be a barrier for Australia to gain access to this important treatment. It is unethical and possibly illegal to make this product unaffordable for people on low incomes.

Readily available at a low cost.

In the past I have had a few friends who used or use CBD oil ongoing (currently).

Case A) my friends son had AML Leukaemia (the worst kind) she struggled to get the oil legitimately and unfortunately had to go underground to get it at whatever cost to help her terribly sick son.
Case B) another friends daughter has seizures, she can have up to 100 in an hour. When she was little the mother used illegal CBD. They couldn't leave the country for fear of it using the illegal substance so we're unable to travel. The mother now gets pharmaceutical CBD she says it's a more stable product but the cost is astounding at close to \$ 2,000 a month. The woman is a single parent and struggles I would therefore like the cost to be reduced and subsidised by Medicare. My husband has just been prescribed CBD oil \$300 for chronic back pain after 3 surgeries, he's a 52 year old builder. He hasn't purchased the oil due to the huge cost so he sits on the script wishing he could afford it to try to mitigate his pain. I would much rather he be on or at least try CBD oil so he can use something other than endone. I am not a fan of opioids and don't even like them being inside the house with 3 children.

As aforementioned it's makes or breaks the chance of using it. People are missing out on the opportunity to try as they can't afford it.

This becomes a social

Problem where only the wealthy can afford such a drug. That doesn't sit well with my values as we should look after the vulnerable in society.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe CBD oil should be widely accessible as I have used it successfully myself already for minor symptoms such as improving sleep quality, reducing anxiety and minor pain relief. .

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD oil overseas legally for mental health symptoms such as anxiety with positive outcomes.

For those on DSP and similar, low price access to CBD is crucial

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD (with no or less than 0.1% THC) in Europe for general wellbeing, and to reduce of mild stress and inflammation, with very good results and no adverse side effects for 3 years. I tried CBD because I had not found any credible studies that showed CBD to cause negative effects, or interactions that should cause concern, and considered it reasonably safe to try. It was not necessary to consult a pharmacist to purchase CBD in Europe. I would not consider a pharmacist's advice to be necessary to ensure the use of CBD is safe, and prevents abuse or addiction, because of my experience with CBD. I take asthma, migraine and arthritis medication regularly. Adding CBD to these medications gave me no adverse side effects. CBD acted very gently over a period of time. Under a GP's supervision, I cut back on my use of NSAID's to less than a quarter of the dose/frequency compared to pre/post CBD, with the same reduction in pain and inflammation. I could stop taking antacid and anti-spasmodic medication that was needed to cope with taking NSAID's. Over 3 years my incidence of headaches reduced from once every 2 or 3 weeks, to once per year. Coming back to Australia where CBD is not available has meant increasing my dose of NSAID's, restarting antacid and antispasmodic medications, and an increase in the frequency of headaches.

My personal experience with CBD is that it a safe, effective addition to a regimen intended to support overall well-being, with zero negative effects. My good health and enjoyment of life will increase with the legal availability of CBD in Australia.

I believe that the price for CBD should be due to 1. quality, and 2. healthy business competition. Businesses that provide chemical analyses of their product, that can be checked, for a competitive price deserve to win market share. People who are looking to manage health issues deserve to be able to choose for themselves from a range of options that suit their situation, and not be restricted to a non-competitive option.

Please consider opening access to CBD by everyone in Australia by allowing healthy business competition. Australians are very able to

identify and choose quality products and businesses.

I would use CBD in a safe way and read the label and warnings.

I live in an area with a high percentage of elderly people. I witness community and family members with all sorts of issues where they need help with pain, stress and inflammatory bowel and arthritis issues. I was stunned to hear that many 70 yrs plus in my local area have tried or intend to try CBD. The overwhelming majority of stories I have heard describe great success with it and without any negative side effects. This is medicine that helps people without damaging their bodies. It does not require harsh chemicals or pesticides to grow it. It should be widely available at low cost for the elderly, pensioners and the public in general.

I'd prefer it to be at a moderate price. Around the \$150-\$200 mark. As weed is a very easy plant to grow even if the government regulates it. At the price I've chosen I'd want at least 80-100mls of concentrated oil with the maximum amount of cbd in it. (more bang for your hard earned buck) not for me personally but for people in lower economical brackets of society. So people don't have to keep taking Panadol in order to relieve pain or sleeping medications/anti depressants. Marijuana should be shared at the most reasonable price possible.

It's for the greater good of the community. There's enough scientific studies to say it has an important part in people's health. Natural only. Improves the myelin sheath in people's neural transmissions which is super important for people's health.

Natural forms of CBD only. Keep pharmaceutical companies answerable to a body or organisation that is for the people first and foremost. Keep Australia's pharmaceutical reliance on local sources. Allow the CSIRO to be world leaders in this science. Let's start locally. Australia can lead the way.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have friends who have found CBD very helpful for anxiety and pain.

If the price is too high people would not be able to consistently access it for their health concerns

through companies that have shown good manufacturing practices and provide certificates of analysis for each batch so there is known concentrations of CBD in their products

I would use CBD in a safe way and read the label and warnings.

I gave CBD to my dog who had an aggressive osteosarcoma, and this relieved her pain and helped her sleep, better than Gabapentin and other pharmaceutical drugs available.

It should be available to use for those financially challenged, as for pain, anxiety and sleeping it is more effective and has fewer side effects than pharmaceutical drugs.

CBD via a pharmacy offers a widely available means for everyone to access this wonderful product, whilst having advice available on how it can be safely and effectively used.

Cbd has changed my life. My anxiety was getting debilitating and I had several trips to the doctors and hospital because I became almost unable to function. When I started on cbd oil, I could not remember the last time I felt my mind so quiet and calm. I wish I knew about it sooner.

I'd pay almost anything to get cbd. But obviously the cheaper it is, the more accessible it can be for the general public.

I would use CBD in a safe way and read the label and warnings.

I think a lower price should be the case as it makes it accessible to all those who need it and not exclusive to those with higher incomes!

Should be accessible to all the public as an 'on the shelf' like other hay fever, cough medicines and paracetamol and not restricted by 'red tape'.

Only publish my submission on the TGA website with confidential information redacted. My name and address nor health history

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I could use CBD to help control my anxiety/stress levels. I have spoken to others that have found that it is of great benefit and have used it without any issues. Friends and family have used prescription and black market CBD with great results..

If CBD was priced at a higher level I wouldn't be able to afford it. I believe if it is available at a lower price all Australians, of all ages, would be able to have access to CBD, it's a natural product.

I think the best way to make CBD available would be through a Pharmacist.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

After reaching 50, I noticed my sleep patterns went out of whack. I was having more and more difficulty getting to sleep, and staying asleep. I've found CBD oil to be a wonderful gift in aiding more restful sleep. I still wake alert and refreshed, unlike taking melatonin that can make me somewhat groggy when I first wake up.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I suffer with adhd, while travelling in the uk I was able to access some cbd oil over the counter. I had never tried it before but a friend suggested it to me to help deal with some of the issues I suffer with as a result of having a neurodiverse brain. I found it extremely helpful for getting through the day and sleeping at night. It was easier to concentrate, to relax, and to get things done that I normally found difficult.

I am a single mother, getting access to cheaper cbd would be beneficial as I am on a tight budget (a lot of the reason I don't take regular adhd medications).

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

As a health practitioner, I have seen quite a number of patients over the years who have used CBD oil products, which they have had to privately source themselves, to assist them with a wide range of conditions. These people have invariably been unsuccessfully treated by medical practitioners and specialists in particular for conditions associated with pain, anxiety and sleeplessness; they have often taken prescription drugs that have not worked and/or been associated with untenable side-effects. In many cases CBD has worked more effectively and enabled them to get back to a more normal life. The effects of CBD on their pain and anxiety in particular has been noteworthy, providing them much relief.

As mentioned, these people have in all cases sourced CBD through non-official channels, as it is almost impossible for them to access through GPs - which is also a prohibitively expensive option for most people. In NO case has anyone ever reported any adverse side effects from using CBD, only relief of symptoms. The only reports of unpleasant side effects that have been reported to me are from their prescription drugs, which they abandoned in favour of CBD which they found to be a safer and more effective option.

I consider that price is a crucial factor in peoples' ability to sustainably access CBD. Many people who suffer from the chronic conditions that CBD has been found to be effective come from financially disadvantaged sectors of the community (e.g. the elderly and those welfare and other low income situations). The current difficulty of access to CBD and its cost make it unreasonably prohibitive. Under the TGA's plan to down-schedule CBD to a pharmacist-only medicine, this situation would remain largely unchanged. Access would remain prohibitively bureaucratic and the products still highly-priced, keeping it out of reach for those that need it most.

I would like to protest that the TGA's public consultation on CBD appears to be disingenuous. Recommendation 12 of the Senate inquiry that triggered the consultation clearly stipulates that 'the TGA, as a

matter of priority, conduct broad public consultation on the future of scheduling of CBD and other non-psychoactive cannabinoids', "which should consider ... the suitability of regulating these cannabinoids as complementary medicines, through removal from the Poisons Standard and inclusion in the Therapeutic Goods (Permissible Ingredients) Determination".

WHY has the current consultation, which does not even mention any identifiable key terms in its title (detracting from its transparency for the public), not mention this and not provide the opportunity for public feedback on the specific option that the Senate has defined? Is the Australian Parliament or bureaucrats running the agenda?

Further compounding the disingenuity of this consultation process, the TGA's preferred option to down-schedule CBA from Schedule 4 to Schedule 3 in the Poisons Standard, is the fact that any CBD product available under Schedule 3 would have to go through a Registered medicine application and must meet impossibly high efficacy thresholds. In other words, as a Schedule 3 medicine IT WOULD REMAIN UNAVAILABLE FOR YEARS, so the TGA would be making it more available to people on paper - not in reality and not in any way in the foreseeable future.

This is NOT consistent with the Senate recommendation to consult on the availability of CBD as a listed medicine ingredient, which would make it widely available and at a lower cost to the public. Option C ('hybrid') version would cover dosage (low dose) and required labelling safeguards to ensure a high quality product fit for purpose. The TGA could be held publicly accountable for keeping countless numbers of Australians in a state of ongoing, unnecessary suffering by withholding easy and affordable access to this safe ingredient with an international track record of safety.

Allowing access to CBD as a listed medicine ingredient would also ensure people access products of known high quality, manufactured in Australian GMP facilities. People are already currently accessing CBD 'off grid', with all the risks associated with this (including accessing substances of unknown quality, increasing consumer risk).

A TGA safety review has already established that low doses of CBD may have possible clinical utility when used via the oral route in the management of some conditions that do not require medical practitioner oversight, establishing that CBD has an acceptable safety and tolerability profile at low doses.

CBD has been found to be generally safe and reports from patients on an international level indicate that negative drug interactions are in fact uncommon.

Given that CBD is publicly available in many overseas jurisdictions with a demonstrated good safety record, the TGA has established an acceptable safety profile for CBD at low doses and the Senate has asked the TGA to consult the public on its availability as a listed medicine ingredient (and REMOVAL from the Poisons Standard, not down-scheduling) - it is perplexing that the TGA has appeared to take matters into its own hands and offered an Clayton's option that effectively maintains current tight restrictions on its access to the thousands of people that need it most.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The proposed change wouldn't impact me at this time, as it isn't something I'm looking to use right now. However, I have patients as well as family who would benefit from better access and I think it's a herbal medicine that should be more readily available.

For those dealing with chronic issues, cost may be a barrier to getting what they need. Having said that, quality is of the utmost importance.

Guidelines on potential interactions, appropriate dosage recommendations and safety guidelines, and a consistent quality product are key.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I live with a chronic pain condition known as endometriosis, currently my only option for pain relief is pharmaceutical analgesics that have shown to do a lot of damage in both long term and short term use. As these are my only options I live with the pain and have no option for alternatives, CBD has been studied and shown to provide amazing results for people living with chronic pain, IBS, Chronic inflammation, Neural disorders and more, these studies coming out of America have shown that it has countless benefits and when used correctly very little chance of side effects. If the tga believes that the risk of CBD is higher than the risks of the current pharmaceuticals then they really need to reanalyse the risks associated with these pharmaceuticals, even a basic comparison shows that CBD is far safer than most of the readily available analgesics such as paracetamol, right now there are people living with conditions that could be greatly helped with CBD oil and yet they do not have this option because of outdated and unreliable studies from the past.

Analgesic options should be available for low income earners not just those that can afford it, CBD oil could be beneficial to many living with chronic pain who are unable to work due to this pain.

I believe that CBD should be able to be prescribed by those with training in herbal medicine, although pharmaceutical companies are undertaking the manufacturing of cbd oil, pharmacists and GPS will need advanced training in relation to the pharmacokinetics and pharmacodynamics of herbal medicine.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Friday, 22 May 2020 5:14:06 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It would mean that my friends and family using CBD would be patients instead of criminals.

If it too high no one can access it. If it resonable price everyone can access CBD

Prove negative effects before deining anyone in need

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Lower prices means I can access cheaper medication and I will not have to rely on heavy medications to relieve sideaffects.

Through pharmacies and trusted businesses.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

The proposed change will enable a natural choice to fight against illnesses such as chronic long term body pain, cancer, epilepsy and other illnesses caused by ptsd, and possibly help with other health issues.

I believe it should be at a price where it cannot be abused, but also at a price which is reasonable like other pbs medicines available over the counter from a pharmacist

Prescription only

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have friends and family overseas that have benefited immensely from using CBD oil without and with THC.. for a huge range of different medical reasons, and see absolutely zero reason why Australian consumers do not have the right to choose this product as a medical option. As a trained nurse I have also seen the undoubtable benefits some patients have experienced through doctor prescribed CBD oil. Although the very high prices have forced many to cease taking it.

Lower prices would make it accessible to more people.

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have long lasting effects from chemotherapy (2006/07) which include mild pain. This in turn disrupts my sleep. There are other effects that may also be lessened. I am 71yo. I do not know if these lower doses would be sufficient but would like to try. There is anecdotal evidence suggesting the efficacy of CBD.

Being a pensioner, cost is extremely important.

Access could be through licenced allied health professional (Naturopaths etc) and pharmacies.

I would use CBD in a safe way and read the label and warnings.

I believe that cannabis has a wide range of positive effects on humans. I personally have used CBD oil while overseas in times when I was having trouble sleeping, it really helped minimize the anxiety I was experiencing and enabled me to get a restful night's sleep. I found it to be a powerful experience and was surprised at how only a few drops helped me immensely. I did not get it from a pharmacist so I don't think it would be dangerous to put out on the shelves. People can read the label and adjust their dosage accordingly.

I would love to see CBD products out there and would definitely use it in times of stress, change and for general health benefits. It's exciting to think of all the research that can be done and how much this plant can help people :)

The price of CBD should be reasonable. If it's too expensive not many people will be able to access it. I guess price could be adjusted depending on the amount of CBD in the product.

I really look forward to seeing it on the shelves. I'd love to learn how to work it into balms, creams and learn about the therapeutic benefits of CBD
