

RE Homeopathy ruling by TGA.

I have used homeopathy for 40 years and as a Naturopath (38Years) and Pharmacy Assistant (17 years), it has been my go-to modality for effective healing, especially for acute health issues.

Countries such as Belgium, German, Hungary, Portugal, Russia, Great Britain, and more recently Switzerland and Sweden recognize homeopathy, while in India and Brazil, Mexico and Pakistan and Great Britain it forms part of the national health system.

WHEN IS AUSTRALIA GOING TO WAKE UP TO THIS SIMPLE MEANS TO REDUCE THE MEDICAL BLOWOUT?

With the NHMRC report under dispute, and the powerful lobbying of the Drug companies warping the picture, at least leave Australians free to choose Homeopathy if they want to. It's not as if it is dangerous..... like so many drugs are!

OPTION 1 PLEASE.
