

To whom this may concern,

I am writing to you to provide you with my support for Homeopathic Medicine use within Australia.

It is my understanding that the TGA is proposing to re-classify Homeopathic medicine in Australia, potentially resulting in access to homeopathic products no longer being available to the public.

I am of the opinion that:

I am in VERY STRONG support of option 1, which would **keep Homeopathic products classified as they are currently as therapeutic medicine**, allowing access to those of us that wish to access this as our fundamental right to the choice of our own health care.

I am VERY STRONGLY opposed to option 4, in which homeopathic products would be re-classified and we as the Australian public would no longer have access to them.

We should have the right to choose the type of healthcare we receive.

Kind Regards,
