

From:

Dear Sir/Madam,

I would like to submit my comments on the 'Options For The Future Regulation of Low Risk Products'

I strongly reject option 4 of the TGA Consultation which will not only restrict homeopathic information, remedies and my access to them but will completely eradicate my right to freedom of choice in whatever health modality I think suits me. I've been using homeopathy for 30 years and it has never failed to heal/cure any ailment I've had at any time in a gentle, non threatening manner with no harmful side effects. I would be completely devastated and very upset if it was taken from me.

The TGA and every drug regulating authority around the world considers homeopathic remedies to be "low-risk" medicines – there's no reason for that position to change now. Millions world-wide successfully use this form of treatment and if the TGA is, as they say, there to uphold our safety in relation to medicines and treatment, and not to restrict our access to safe/low risk medicines then homeopathy in no uncertain terms meets this criteria.

I choose and therefore suggest that option 1 be the way to proceed now.

Thank you.
