

Submission re homeopathy

To whom it may concern:

Since I was a mother of young children (1981) my health (and theirs when they were living at home) has been supported by homeopathy.

It is important to me that homeopaths and their remedies are given full support as an approved complementary medicine.

I ask that there be no regulations barring the use of homeopathic remedies. This would mean the end of homeopathic practice, and the end of a service to me that supports my overall well being.
