

Dear Sir/ Madam

I have studied in a Government funded Homeopathic Medical College and was trained in the attached Homeopathic Hospital in India for 6 years. I also Lectured at the Nehru Homeopathic Medical College and Worked as a Physician at the attached homeopathic Hospital under University of Delhi for 10 years. While working in the health Department, I have to work in various health projects of Government of India, some of them funded by World Health Organization and was honored by Delhi Government for my contribution in the community health.

I also know that TGA has mighty power which is bestowed to use in the best interest of Australians. However, a mistake will cause immense harm by inhibiting and snatching the right of freedom to chose a system of health for their benefit.

I migrated from India. Government of India had a committee to look into the efficacy of homeopathy if it is effective and can be used as a mainstream healthcare system. The answer was yes.

So, Government of India have been using homeopathy as an official health care system for the last 50 years which has benefited huge number of patients at the grass root level and reduced the burden on the Government funded health care system and hospital admissions.

I have been a part of it as I was a working in the Government Homeopathic Hospital and lecturing at Government funded Homeopathic Medical college under University of Delhi.

Please see the huge investment this medical college and hospital by following the link:

<http://www.nhmc.delhigovt.nic.in/>

Homeopathic medicines are proved for their effect on the disease conditions and symptom complexes, please go through the link of Central Council of research In homeopathy, Government of India:

<http://ccrhindia.org/drug%20proving.asp>

and read one of the monograph of proving of a drug called Ficus religiosa for example:

<http://ccrhindia.org/drug%20proving.asp>

Homeopathic Pharmacopoeia Laboratory of Ministry of Health and Family Welfare Government of India, is an example to understand the amount of work done in another countries and how can Australia is just trying to go through a path where all the Australians will be deprived of a therapeutic system by TGA. Please go through the following link to see what is that:

<http://www.hplism.nic.in/index.htm>

National Institute of Homeopathy of Ministry of health and family welfare is a living example how people are benefited , please go through the link and it will speak for itself:

<http://www.nih.nic.in/>

If you have gone through all this, I am sure it will jolt you and make you think again before going through the path you are thinking.

**Last but not the least, I urge TGA to keep the status of homeopathy as it is and not to change in anyway.**
