Submitted to Proposed refinements to the regulation of personalised medical devices
Submitted on 2021-07-08 15:50:32

Introduction

1 What is your name?

Name:

[REDACTED]

2 What is your work title?

Work title:

[REDACTED]

3 What is your email address?

Email:

[REDACTED]

4 What is your company/organisation?

Organisation:

[REDACTED]

5 What is your company/organisation address?

Please provide the business address of your company or organisation.:

[REDACTED]

6 Which industry do you work in, or represent?

Please state the industry that you work in, or are representing in your submission.:

Dental technology

7 Are you responding:

On behalf of an organisation

Exclusion

8 Do you agree with the rationale for the proposed exclusion of products?

Yes

If you answered 'no' to the above question, why do you disagree with the rationale for the proposed exclusion of the products listed?:

9 Are the risks posed by the products adequately managed if they are excluded from regulation by the TGA?

Yes

Please explain your response, including by providing examples that illustrate and/or support your position.:

10 Are there further products that meet the principles proposed for exclusion? What are they and why should they be excluded?

Ensure your answer directly addresses (1) why the products pose no, or insignificant, levels of risk or (2) why the product does not meet the definition of a medical device. :

To be honest any item that a dentist requests and fits, should be free from the level of risk, as 1 it is being fitted by a professional, who will see instantly if there is a issue, and 2 70% of technicians are trained professionals in this country.

as much as i hate to admit you can be a truck driver on Monday and open a dental laboratory on Tuesday and call yourself a technician, you are trying to impose restrictions on a industry which is not governed.

enforce the need for all technicians to be registered with the dental board as professional trained people we are (in the majority) the sooner you have accountability at local level aswell as federal level with theTGA

Exemption

11 Do you agree with the rationale for the proposed exemption of Class I non-sterile, non-measuring patient-matched devices when produced under the circumstances listed in the consultation paper?

Yes

If you answered 'no' to the above question, please explain why it is that you disagree with the rationale for the proposed exemption of Class I non-sterile, non-measuring patient-matched medical devices?:

12 Can the risks posed by Class I non-sterile, non-measuring patient-matched medical devices when produced under the circumstances listed in the consultation paper be adequately managed if they are exempted from inclusion in the ARTG?

Yes

Please explain your response, including by providing examples that illustrate and/or support your position.:

the easiest way I have mentioned for the [REDACTED] to register technicians so there is accountability at state level first

ensuring manufacturers keep records for 5 years for digital cases

13 Are there further circumstances where Class I non-sterile, non-measuring patient-matched devices could be exempt? If so, what measures are in place to manage the risks associated with the devices?

Ensure your answer directly addresses the specific circumstances that are in place (such as qualifications, accreditation, certification, etc) to ensure that the risks associated with the manufacture of the devices have been managed and the Australian regulatory requirements for medical devices have been met before they are supplied.:

retainers [REDACTED]
crown and bridge

Alternative conformity assessment procedures

14 Do you agree with the rationale for the proposed alternative conformity assessment procedures for Class IIa patient-matched medical devices when produced under the circumstances listed in the consultation paper?

No

If you answered 'no' to the above question, please explain why you disagree with the rationale for the proposed alternative conformity assessment procedures for Class IIa patient-matched medical devices?:

there is a standard that is taught worldwide, for class 2, crown and bridge and orthodontics, this subject covers a multitude of cavities that ensure the item matches the required need.
no different from a denture or splint, see my previous comments on how best to manage this

15 Do you agree that the risks associated with the Class IIa patient-matched medical devices when produced under the circumstances listed in the consultation paper could be adequately managed through the proposed alternative conformity assessment procedure?

Yes

Please explain your response, including by providing examples that illustrate and/or support your position.:

16 Are there further circumstances where an alternative conformity assessment procedure for Class IIa patient-matched devices would be appropriate?

Please ensure that your answer directly addresses what measures are in place to manage the risks associated with the devices.:

17 Are there any Class IIa patient-matched medical devices that should not be subject to an alternative conformity assessment procedure? What are they, and why not?

Please outline your reasoning.:

crown and bridge and orthodontics all dental appliances

Alternative approaches we should consider

18 Are there alternative mechanisms for minimising the regulatory burden for patient-matched medical devices without compromising patient health and safety that you would like to propose?

If applicable, please write your response in the text box below.:

getting all technicians registered with the dental board will ensure that all future technicians are qualified, and removes any back yard dodgy outfits, and will ensure all appliances Australia wide are made to a national standard at all times by everyone not just those who are qualified

Required final step - Publishing my response

19 Do you consent to the Department collecting the information requested in Citizen Space about you, including any sensitive information, for the purposes of this consultation?

I consent

20 I consent to the submission made by me being published on the Department's website, and accessible to the public, including persons overseas, in accordance with the following preference:

Publish response without my name or my organisation's name (anonymously)

21 If there are specific answers you have provided that you do not wish to be published, please indicate these below.

Please state below any specific questions that you do not wish to have your answers to published.:

22 May we contact you for further information or to seek feedback about how the consultation was undertaken?

Yes

23 By making a submission, I acknowledge that:

I acknowledge the above
